Theory Mark	Practical Mark	Total Mark
Subject: JavaScript with JQuery		
Max.Mark:50		Time:30 Minutes

I Choose correct answer from the bracket (✓) (Each One Mark)

1. JQuery is developed in _____. (2004 , 2005 , 2006)
2. The syntax of a blur method in a button object is _____. (Blur() , Blur(contrast) , Blur(value))
3. Cost for Using JavaScript in your HTML is _____. (Its Free , \$10/year)
4. JavaScript Code can be called by using _____. (RMI , Function , Preprocessor)
5. The syntax of close method for document object is _____. (Close() , Close(doC., Close(val))
6. _____ is the tainted property of a window object. (Pathname , Host , Protocol)
7. _____ JavaScript is also called client\$side JavaScript. (Navigator , Microsoft)
8. Using _____ statement is how you test for a specific condition. (Select , If , None of this)
9. JavaScript is interpreted by _____. (Object , Client , Server)
10. The <script LANGUAGE="JavaScript">tag _____ at the very end of your (The </script> , The </endscript> , None of these)
11. >=n is _____ operator. (Conditional , Adition)
12. The syntax of close method for document object is _____. (Close() , Close(val) , Close(object))
13. _____ is a wrapped Java array, accessed from within JavaScript code. (JavaScriptArray , JavaScriptClass)
14. The syntax of a blur method in a button object is _____. (Blur() , Blur(contrast) , Blur(value))
15. _____ is the tainted property of a window object. (Defaultstatus , Protocol , Host)
16. Using _____ statement is how you test for a specific condition. (Select , If , For)
17. JavaScript is interpreted by _____. (Client , Server , Object)
18. Java was developed in _____. (1991 , 1919 , 1920)
19. _____ is a incement operator. (++ , + , .+)
20. _____ is a Prime number. (3 , 4 , 6)

II True or False. (✓) (Each One Mark)

1. Is it possible to nest functions in JavaScript. True False
2. JS code included inside head section is loaded before loading page. True False
3. All modern browsers supports JS. True False
4. HTML5 and JavaScript are languages. True False
5. JQuery is using to Adding Animations. True False
6. Array is related with JavaScript. True False
7. JavaScript is used to develop static web pages. True False
8. Local Browser used for validations on the Web Pages uses Java. True False
9. In JavaScript, Window.prompt() method return true or false value. True False
10. JQuery is a programing software. True False

I Choose correct answer from the bracket (✓) (Each One Mark)

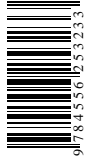

- PHP variables are preceded by _____.(-, @, \$)
- PHP introduced in _____.(1994, 1995, 1996)
- _____not considered Boolean false. (0, "0", 1)
- Multiple select/load is possible with _____.(Checkbox, Select, File)
- _____ is a Ternary Operator.(?:, :?, +=)
- _____ supported by 'str_replace()'function.(Array, Integer, None of this)
- PHP files have a default file extension of _____.(.html, .xml, .php)
- The datatype best suited to store currency values is _____.(INT, DECIMAL)
- The statement used to create a trigger is _____.(CREATE TRIGGER, CREATE TRIGGERS)
- PHP stands for _____.(Personal Home Page, Hypertext Preprocessor)
- The column not returned by 'OPTIMIZE TABLE' is _____.(Table, Msg_txt, Op)
- The datatype best suited to store currency values is _____.(DECIMAL, INT, FLOAT)
- PHP scripts are executed on _____.(Server Computer, Client Computer)
6. In PHP, each statement must be end with _____.(. (dot), ; (semicolon), . / (slash))
- Data for a cookie stored in _____ in PHP.(In ISP Computer, In User's Computer)
- PHP is an example of _____ scripting language.(Server-side, Client-side, In-side)
- DBI scripts are located in the directory _____.(cgi-inc, cgi-bin, cgi-usr)
- A stored program associated with a schedule is _____.(Trigger, Event, Stored function)
- PHP scripts are enclosed within _____.(<php> ... </php>, <?php ... ?>, ?php ... ?php)
- PHP is an example of _____ scripting language.(Server-side, Client-side, In-side)

II True or False. (✓) (Each One Mark)

- DROP TRIGGER Command is not used to drop the trigger. True False
- Is it possible to submit a form with out a submit button. True False
- Dose PHP 5 support exceptions. True False
- A NULL value is treated as a blank or 0. True False
- PHP and MySQL are almost similar. True False
- Is php can support multiple inheritance. True False
- PHP stands for Hypertext preprocessor. True False
- Source command is used to import data in MySQL. True False
- The PHP interpreter switches mode continuously. True False
- The basic operation of PHP is to interpret a script. True False

I Choose correct Answer from the Bracket (✓) (Each One Mark)

- Numeric value stored in _____.(Plot , Int , Double)
- C++ is an _____ programming language.(Inheritance , Polymorphism , Object oriental)
- User defined data types known as _____.(Object , Class , Enumerated)
- C++ was developed in _____.(1982 , 1972 , 1990)
- C is the modification of _____.(BCPL , BASIC , BSC)
- Delaration a pointer more than once may cause _____.(Error , Trap , Abort)
- Default constructor has _____ arguments.(No argument , One Argument)
- A C++ code line ends with _____.(A Semicolon (;) , A Comma (,) , A Slash (/))
- STL stands for _____.(Simple Template Library , Standard Template Library)
- C++ was developed in _____.(1982 , 1972 , 1999)
- The statement used to exit from a 100p? _____.(Break , Exit , Continue)
- Class members are _____ by default.(Public , Private , Class)
- Collection of one or more variable are called _____.(Data , Array , Structure)
- _____ is av example of double character constant.(a , 123 , ab)
- TAn expression A.B in C++ means _____.(B is member of Object A , Product of A and B)
- _____ operation is used as Logical 'AND'.(Operator-&& , Operator-& , Operator +)
- The operator >> is called _____.(Get to Operato , Either a or b , None of this)
- C++ was originally developed by _____.(Bjarne Stroustrup , Donald Knuth , Nicolas Wirth)
- _____ is a equality operator.(!= , <= , <=>)
- A number,whose base 2 is called _____.(Binary , Decimal)

II True or False. (✓) (Each One Mark)

- The keyword used to define a structure is struct. True False
- C=sum(a, b) This is the example of function definition. True False
- C++ Programs are casually mentionable and expandable. True False
- Header files often have the file extension 'H'. True False
- Super classes are also called Parent classes/Base classes. True False
- Coding program is a Computer Language. True False
- () Function is subscripting operator. True False
- Some Streams work with input, and some with output. True False
- ` Evaluate the following expression: 3 >6&&7>4. True False
- Logical expressions combine two or more relational expression. True False
